Dzięki nowoczesnej, dwuwarstwowej powłoce KTL udzielamy 12-letniej gwarancji na trwałość powłoki i szczelność grzejnika.

Thanks to the modern, double-layer KTL coating, we offer a 12-year warranty on coating durability and radiator tightness.

Dank der modernen, zweilagigen KTL-Beschichtung gewähren wir eine 12-jährige Garantie auf die Beständigkeit der Beschichtung und die Dichtheit des Heizkörpers.

Grâce au revêtement moderne à double couche KTL (cataphorèse), nous offrons une garantie de 12 ans sur la durabilité du revêtement et l'étanchéité du radiateur.

Благодаря современному двухслойному покрытию KTL (катафорез) мы предоставляем 12-летнюю гарантию на стойкость покрытия и герметичность радиатора.

PL Technologia **KTL**, stosowana również w branży motoryzacyjnej, gwarantuje dokładne pokrycie metalu nawet w trudno dostępnych miejscach. Tworzy trwałą, szczelną warstwę ochronną, która minimalizuje ryzyko pękania farby i skutecznie zabezpiecza grzejnik przed wilgocią w łazienkach oraz innych pomieszczeniach o podwyższonej wilgotności.

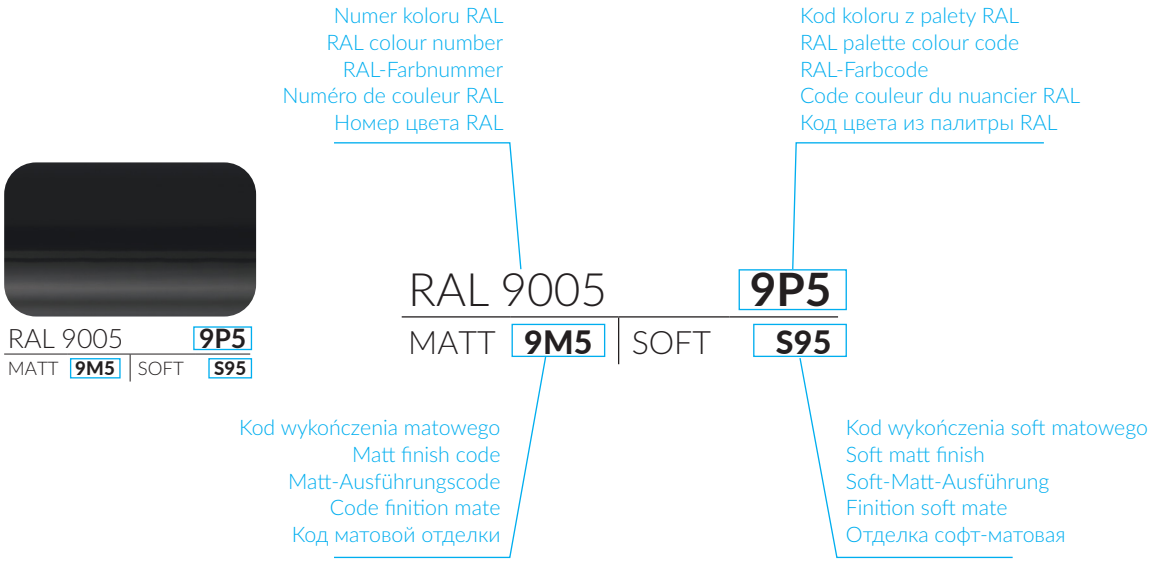
EN **KTL** technology, also used in the automotive industry, guarantees complete metal coverage even in hard-to-reach areas. It creates a durable, sealed protective layer that minimizes the risk of paint cracking and effectively shields the radiator against moisture in bathrooms and other high-humidity areas.

DE Die **KTL**-Technologie, die auch in der Automobilindustrie eingesetzt wird, garantiert eine vollständige Metallabdeckung selbst an schwer zugänglichen Stellen. Sie bildet eine dauerhafte, dichte Schutzschicht, die das Risiko von Lackrissen minimiert und den Heizkörper in Badezimmern sowie anderen Räumen mit erhöhter Luftfeuchtigkeit wirksam vor Feuchtigkeit schützt.

FR La technologie **KTL** (cataphorèse), également utilisée dans l'industrie automobile, garantit un recouvrement total du métal, même dans les zones difficiles d'accès. Elle crée une couche protectrice durable et étanche qui minimise le risque de fissuration de la peinture et protège efficacement le radiateur contre l'humidité dans les salles de bains et autres pièces à forte hygrométrie.

RU Технология **KTL** (катафорез), применяемая также в автомобильной промышленности, гарантирует полное покрытие металла даже в труднодоступных местах. Она создает прочный, герметичный защитный слой, который минимизирует риск растрескивания краски и эффективно защищает радиатор от влаги в ванных комнатах и других помещениях с повышенной влажностью.

PALETA KOLORÓW RAL | RAL COLOURS PALETTE | RAL FARBPALETTE NUANCIER RAL | ПАЛИТРА ЦВЕТОВ



PL Każdy produkt malowany proszkowo na kolor z palety RAL dostępny jest w wersji SOFT oraz w wersji MATT.

RAL — wykończenie z połyskiem charakterystycznym dla palety RAL ok. 75% połysku).
MATT — wykończenie matowe, o umiarkowanym poziomie połysku, w dotyku gładkie (25–30% połysku)
SOFT — wykończenie matowe, o niskim poziomie połysku i satynowej powierzchni, w dotyku aksamitne (poniżej 10% połysku)

EN Each product powder coated in a colour from the Terma RAL palette is available in the SOFT and MATT versions.

RAL — a glossy finish characteristic of the RAL palette (approximately 75% gloss).
MATT — matt finish, with a moderate level of gloss, smooth to the touch (25–30% gloss)
SOFT — matt finish, with a low level of gloss and satin surface, velvety to the touch (less than 10% gloss)

DE Jedes pulverbeschichtete Produkt in einer Farbe der TERMA RAL-Farbpalette ist jeweils in einer SOFT- sowie einer MATT-Version verfügbar.

RAL — eine Lackierung mit einem für die RAL-Palette charakteristischen Glanzgrad (ca. 75% Glanz).
MATT — matte Oberfläche mit mäßigem Glanzgrad, glatte Struktur (25–30% Glanz)
SOFT — matte Oberfläche mit geringem Glanzgrad und satinierter Oberfläche, die sich samtig anfühlt (weniger als 10% Glanz)

FR Chaque produit revetu par poudre coloree de palette ral est disponible en version SOFT et MATT.

RAL — finition avec une brillance caractéristique de la palette RAL (env. 75% de brillance).
MATT — finition mate, avec un niveau de brillance modéré, lisse au toucher (25–30% de brillance)
SOFT — finition mate, avec une surface satinée peu brillante, veloutée au toucher (moins de 10% de brillance)

RU Каждый радиатор окрашенный порошковым покрытие из палитры RAL TERMA доступны в версиях SOFT и MATT.

RAL — отделка с уровнем блеска, свойственным палитре RAL (75% блеска).
MATT — матовое покрытие, с легким блеском, гладкое при прикосновении (25–30% блеска)
SOFT — матовая поверхность, с низким уровнем блеска и сатиновой поверхностью, бархатистая при прикосновении (менее 10% блеска)

Antibacterial **A96**

PL To biała, antybakteryjna powłoka (RAL 9016) zawierająca związki srebra. Uwalniające się z niej jony srebra niszczą bakterie oraz hamują rozwój pleśni i grzybów. Stosowanie tej powłoki zaleca się w szczególności na produktach znajdujących się w pomieszczeniach sanitarnych. Usługa krycia powłoką antybakteryjną jest równa dopłacie dla powłok standardowych.

EN It is a white (RAL9016) antibacterial coating containing silver compounds. Silver ions destroy bacteria and prevent the mould and fungus growth. Use of this coating is particularly recommended for products located in sanitary facilities. Service charge for this coating is equal to surcharge for the standard coatings.

DE Es ist eine weiße (RAL9016), antibakterielle Beschichtung, die die Silberverbindungen enthält. Die Freisetzung von Silberionen tötet Bakterien und hemmt das Wachstum von Schimmel und Pilzen. Die Nutzung dieser Beschichtung wird besonders für Produkte, die sich im sanitären Bereich befinden, empfohlen. Die Serviceleistung der antibakteriellen Beschichtung ist der gleiche Aufschlag wie für Standard-Beschichtungen.

FR C'est un revêtement antibactérien blanc (RAL 9016) contenant des composés d'argent. Les ions d'argent libérés éliminent les bactéries et empêchent la prolifération des moisissures et des champignons. L'utilisation de ce revêtement est recommandée en particulier pour des appareils situés dans des pièces sanitares. Le service de couverture antibactérienne égale le supplément couleur.

RU Антибактериальное покрытие белое (RAL 9016) содержит ионы серебра, которые уничтожают бактерии и предотвращают появление плесени и грибков. Использование данного покрытия особенно рекомендуется в случаях расположения радиатора в санитарных помещениях. Стоимость антибактериального покрытия равняется доплате за стандартный цвет.
